FULL STACK DEVELOPER

Skilled software engineer with over 3 years of experience in building different scale websites using a variety of technologies and coding languages. Experienced in working with teams of different sizes and consistently demonstrating effective communication skills. Proficient in working in Agile environments and collaboration with cross-functional teams to deliver high-quality and maintainable code. Committed to continuous learning and staying updated with the latest technology trends, being innovative and getting things done in time.

Work Experience

OmegUp Tunisia   Apr 2021 – Present
Full Stack Engineer: React/TS/NodeJS/C#/.net/MeteorJS/NextJs/ MaterialUI/MongoDB/SQLserver   *Zarzis, Tunisia*

Project School Online (Saas)

- Researched, evaluated and synthesized technical information to design the base infrastructure to the product developing environments.
- Troubleshooted, tested, reviewed and fixed issues and bugs.
- Transformed Figma design templates into ReactJs/typescript.

Project Bevioo

- I led a 4-person frontend team (development and design) and coordinated with the product owners to successfully decrease the development process time by 35 percent.
- Refactored and implemented previous backend environment which resulted in less developing time approximately 50%
- Supervised team members by preparing and simplifying tasks, and performing code reviews.

Project Delivery Service France

- Created new user interfaces and adjusted the previous work to improve the compatibility with the Figma design to 100%.
- Refactored the Rest Api Services used at the start of the project to reduce the project frontend development time by 25%.

Project Task Manager

- Gathered and documented customer requirements, established logical and physical specifications
- Translated design templates into ReactJs/typescript.
- Implemented the business layer.

Project official Website of OmegUp

- Planned the workflow, built the architecture, designed models and interfaces, found solutions and developed all the process layers to deliver the new OmegUp official website.

Project Fast Food Delivery

- Planned the workflow, built the architecture, designed models and interfaces, found solutions and developed all the process layers to deliver the new OmegUp official website.
- Assessed and processed data and network models to optimize architecture and to evaluate the global performance.
- Implemented all the backend architecture and features using NodeJS, MeteorJs.

Project Official Website of the Agricultural Investment Agency (Agricultural ministry)

- Translated web templates using ReactJs, Typescript and Prime React UI library.
- Integrated some features on the backend using dotnet.
- Added a multi-language feature using I18n.

Project Jupiter

- Designed user friendly interfaces using ReactJs framework and Bootstrap library.
- Improved the business layer and integrated Redux into the project as a state management solution.

Projects

Naqdi Project | *React, Typescript, Flutter, mongoBD, Firebase, nodeJS*   **March 2023 – Sep 2023**
- Created Naqdi Android/IOS mobile application using Flutter.
- Managed and contributed to the Naqdi frontend web development process using React/typescript/Figma/Rest Api.
- Tested and optimized the project throughout the whole process.
- Used Cron to schedule the program to execute automatically at 11 AM every morning so a reservation is made for me.

Wisem's Portfolio | *TypeScript, React, Material UI*   **Aug 2023**
- Conceptualized and designed the structure and layout of the portfolio, focusing on user experience (UX) and responsive design.
- Built the portfolio using HTML, CSS, and React ,ensuring cross-browser compatibility and mobile responsiveness.

Education

National School of engineering of Gafsa - Tunisia   **2020**
Software Engineer   *Gafsa, Tunisia*

Technical Skills

Languages: TypeScript, Javascript, C#, Python, Dart, SQL
Technologies/Frameworks: ReactJs, NextJs, NodeJs, Flutter, DotNet, MeteorJs, TailwindCSS, NestJs, MongoDB, Redux, Storybook, MySQL, RxJs, SCSS, FireBase, Git, GitHub, MaterialUI, Bootstrap, Monorepo,Docker., Agile, Scrum Method, Figma, Jira.
